Career Objective

Computer Science and Engineering graduate with Java Full Stack Development training and hands-on project experience in Java, Spring Boot, SQL, and web technologies. Aspiring to leverage technical proficiency, analytical thinking, and problem-solving abilities to develop robust software solutions and contribute to organizational success.

Technical Skills

- Programming Languages: Java, Python, SQL, JavaScript
- Frameworks & Libraries: Spring Boot, Hibernate, React, Django
- Web Technologies: HTML5, CSS3, RESTful APIs
- Databases: MySQL, Oracle
- Tools & Platforms: Git, GitHub, Excel, Ms Word, PowerPoint, Jira, Visual Studio Code, SQL Workbench
- Concepts: Object-Oriented Programming (OOP), Multithreading, JDBC, Exception Handling, SDLC, Agile/Scrum
- Testing: Manual Testing, Test Case Design, Regression Testing, Smoke Testing

Education

DR MGR University *2021 – 2025*
Bachelor of Technology in Computer Science & Engineering

- CGPA: 8.15/10
- **Coursework:** Data Structure and Algorithm, Database Management System(DBMS), Operating Systems, Computer Networks

Experience

Software Engineer Intern *KodNest Technologies* *June 2025 – Jan2026*

- Developed and tested Java-based applications following SDLC and Agile methodologies
- Implemented SQL queries and database operations using JDBC and MySQL
- Performed manual testing, test case creation, regression and smoke testing
- Debugged application issues, conducted root cause analysis, and documented fixes
- Collaborated with cross-functional teams using Git, GitHub, and Jira

Projects

PREDICTIVE MODEL FOR STOCKS AND SALES FORECASTING

- Built time-series forecasting models using LSTM and XGBoost, improving forecast accuracy by 18%
- Processed and cleaned 1M+ transactional records using Python and SQL
- Optimized SQL queries, reducing execution time by 30%
- Integrated external APIs and implemented fault-tolerant data pipelines

TODOVERSE WEB APPLICATION

- Developed a React-based task management system using hooks and component architecture
- Implemented CRUD operations and client-side validation
- Improved application performance through optimized state management

MealToday With Django

- Application Development: Developed MealToday, a Django-based web application for restaurant and menu management, contributing across all phases of the product development lifecycle.
- Secure Design: Implemented user authentication and role-based access control (Admin & Customer) with secure session handling, ensuring designs comply with security specifications.
- Efficient Code: Built dynamic web pages using HTML, CSS, and Django Templates following MVC architecture, emphasizing clean code and maintainability.
- Quality Assurance: Managed code versioning with Git & GitHub, performed comprehensive testing, and resolved routing, template, and database issues to ensure production-readiness and component releases.

Certifications

- SQL Advance Hacker Rank
- Microsoft Azure Fundamentals
- Internet Of Things NPTEL
- SQL basics Hacker Rank
